CHARLES BOYER
PRIMARY EXAMINER

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Applicants have claimed base particles for supporting a surfactant, obtainable by a step of spray-drying a slurry comprising:

- (A) a zeolite having an average aggregate particle diameter of 15 microns or less and a variation coefficient of a distribution of an aggregate particle diameter of 29% or less;
- (B) a water-soluble polymer;
- (C) a water-soluble salt; and
- (D) a surfactant in an amount of 5% by weight or less of the slurry.

The prior art is replete with zeolites of the particle diameter presently claimed. Zeolite A is a commercially available zeolite, extremely common in the art, and has a particle size ranging from 0.1 to 10 microns. Applicants have provided evidence however, that the variation coefficient of zeolite A is 50.5%, coinciding with the examiner's own findings that a relatively low variation coefficient is not taught in the prior art. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles I. Boyer whose telephone number is 571 272 1311. The examiner can normally be reached on M-F 9:30 to 6:00.
